NGEnvironment

Foster European Active Citizenship and Sustainability
Through Ecological Thinking by NGO's

Erasmus+ Programme - Strategic Partnership

AGREEMENT N°:

2018-1-DE02-KA204-005014

What is the purpose of the NGEEnvironment project and what are its benefits from the perspective of Portugal?

Environmental problems are now, more than ever, in the spotlight. Training the environmental leaders of the future is one of the most important things that can be done today to ensure our tomorrow.

The NGEEnvironment project wants to ensure that these leaders have training at their disposal where they can acquire the skills to find creative solutions, to recognise their leadership, and to ensure that they can create the greatest possible impact on their community and the world. In addition, the project wants to demonstrate that environmental entrepreneurship is an effective way to create and increase employment and the efficient use of social capital.

The increasing turmoil in the environment has not went by unnoticed in Portugal. Each day, more and more people become aware of the need to use some of our time to ensure that we create brighter and greener alternatives. Be it on reduction of waste, new power sources, but also on our everyday habits.

Portuguese agencies, such as the National Agency for the Environment, do their best work trying to bring attention to this problems and ensure that we have a national discussion around it, as well as supporting initiatives the bring our youth and adults onto the conversation. In close working relationship with the Youth and Sports Institute, both organisations try and support NGOs who work towards a better and greener future.

NGEnvironment is a project that can be put onto work together with national efforts, contributing to the construction of communities who care and are ready to lend a hand on the work needed to construct a safe Earth.
