Sources of innovation

The Unexpected: The market place is the number one area to look for opportunities. A good manager should be constantly studying the market.

Process Need: Process need involves identifying your company's process weak spots and correcting or redesigning them.

Industry and Market Structure Change: Regulations change and some product lines expand while others shrink. Firms should continually be on the watch for this.

Sources of innovation

Changes in Perception, Meaning, and Mood: Over time populations and people change. The way they view life changes, where they take their meaning from, and how they feel about things also is modified over time and smart companies must pay attention to this in order to capitalize (and avoid becoming forgotten, a relic of ages past).

New Knowledge: As the speed of technological revolution increases there will be an ever increasing number of **opportunities** that open up. The internet has been the most notable one in the last couple decades but there have been a plethora of other industries and opportunities pop up as a result of this technological revolution.

5.2 Αναγνώριση ευκαιριών και επιλογή στην κοινωνική και πράσινη επιχειρηματικότητα

Πώς να διαρθρώσει το πρόβλημα και την προτεινόμενη λύση (MacMillan & Thompson, 2017):

Πως είναι τα κοινωνικά πρόβλημα που θέλω να αντιμετωπίσω;

Πως υποφέρω;
Από τι υποφέρω και πόσο;
Τι προκαλεί αυτό το μαρτύριο;
Πόσο έντονα επηρεάζονται;
Πού βρίσκονται και πώς καταγράφονται γεωγραφικά;
Εάν πρόκειται να είναι μια επιχείρηση, πώς θα δημιουργηθούν έσοδα (κατάσταμα);
Εάν δεν πρόκειται για επιχείρηση, πώς θα εδαφομεταστούν τα λειτουργικά κεφάλαια;

And finally, in module 5, they asked for an example for the elevator pitch, so EPEK made an example for a supposed business idea and its presentation in 2 minutes.

3. Results of I02

The participants didn't know about blended learning and the benefits of using it and the different types of learning (eLearning, Flex).

The participants had a lot of questions about, how they can be an entrepreneur with their own NGO, how can they make a Business Model Canvas.

3. Results of I02

They really liked the elevator pitch and found it very interesting, and they will adopt it in the future in a presentation that they will want to do for their business idea.

3. Results of I02

Participants learned more about the NGEnvironment program and found it very enlightening and useful because they learned things they did not know or some who had knowledge also learned something new.

3. Results of I02

They were also impressed by the cooperation between the European Countries and their good communication, but also the effort for a better future.
