## Meeting Evaluation – Results

The meeting evaluation of the 5<sup>th</sup> NGEEnvironment project meeting shall give an overview of the feedback about the online partner meeting, hosted by Across Limits Ltd., MT via Zoom (online).

This questionnaire was handed out as an online survey during the meeting and was answered by one person per institution to evaluate the meetings content, the meetings design, the coordination and the results of the meeting.

The 5<sup>th</sup> project meeting, although held online via Zoom, went well and none of the partners has anything of urgent matter to declare at this stage of the project.

Nevertheless, the answers show that the Corona pandemic poses challenges in project work. All project meetings, contacts with other partners, etc. are handled online, which makes communication very difficult. Anyway, we are on track with all project activities.

Even so, each partner has a clear picture of the meeting objectives and considered the meeting as helpful. Additionally, the project participants thank for the good cooperation so far and are looking forward to further project work.

Please find below the summarised evaluation data:
